

Full Stack Development

Course syllabus · Mindfull Methods

Level: Intermediate · Duration: 10 weeks · Format: Hybrid

Pricing: INR 14,999 · Cohort-based

Overview

Learn how modern full stack products are built-from UI to API to database. You'll follow a milestone-driven path with mentor reviews on architecture, security basics, and deployment readiness.

What you'll learn

- ? Design RESTful APIs and connect them to a React frontend
- ? Model data with PostgreSQL and write safe queries
- ? Implement authentication and protected routes
- ? Deploy a full stack capstone to production

Weekly milestones

Week 1

- ? Full stack overview
- ? Project setup
- ? Git workflow

Week 2

- ? React patterns
- ? Forms & state
- ? API integration

Week 3

- ? Node.js basics
- ? Express routing
- ? Middleware

Week 4

- ? Database design
- ? PostgreSQL
- ? Migrations

Week 5

- ? Auth flows
- ? Sessions & tokens
- ? Security basics

Week 6

- ? Capstone planning
- ? Architecture review
- ? Milestone 1

Week 7

- ? Capstone build
- ? Code review
- ? Refactoring

Week 8

- ? Testing basics
- ? Error handling
- ? Logging

Week 9

- ? Deployment
- ? Environment config
- ? Monitoring intro

Week 10

- ? Final demo
- ? Portfolio write-up
- ? Career next steps
